SMOKE-VAC 3000 PLUS Smoke Evacuator System

SMOKE-VAC 3000 PLUS Smart Touch Screen Smoke evacuator is a compact, silent and efficient operating room smoke solution. The product uses a new generation of ULPA filtration technology to solve the problem of smoke hazards in the operating room by removing 99.999% of the smoke pollutants. According to relevant literature reports, The smoke condensate from burning 1 gram of tissue has been shown to be equivalent to that of up to 6 unfiltered cigarettes.

Smoke Evacuator System

If I can smell it then it is already in my lungs!

Face mask

4-stage SHE SHA filter

When it comes to surgical smoke, medical face masks give a false sense of security. This is because a standard surgical mask does not offer sufficient protection against the particles and microbes in the smoke. The only effective way to protect against surgical smoke is to extract it directly at the source and filter it with a surgical smoke evacuation system.

Specifications

Noise Levels	40 ~ 65dB	Melting Machine	10A 250V
Filtration	99.9995% (0.12µm)	VInput Voltage	AC 220V 50Hz
Dimensions	520x370x210cm	Max Input Power	1200VA
Weight	10.4kg	Rating Power	900VA
